Overview

The Magnetic Extension was developed to integrate a Magento 2.x website with the Magnetic suite of products and services. By using the Magnetic Extension, Magento 2.x websites will be able to install the necessary website code to integrate with the Magnetic platform.

Supported Versions of Magento 2

The Magnetic Extension was built to support both the Magento 2 Community Edition (CE) and Magento 2 Enterprise Edition (EE).

Versions

Community Edition	Enterprise Edition
2.0.x	2.0.x
2.1.x	2.1.x

Extension Availability

To ensure you have obtained the most up-to-date version of the Magnetic Extension for Magento 2, please be sure to contact your Engagement Manager or Client Success Manager. Alternatively, you may also submit a request to our Support Team by sending an email to support@magnetic.com.

You must have your account CLIENTIDENTIFIER in order to properly configure the extension. The extension will not function without the correct CLIENTIDENTIFIER.

Installation

The extension can be found and downloaded in GitHub at <https://github.com/Magnetic/magento2-extension>. There are two ways to install the Magnetic Extension: Command Line and Manually.

Command Line Installation

1. After downloading the extension from GitHub, upload the app directory into the root directory of your Magento installation.
2. Disable caching under System -> Cache Management in the Magento 2 admin
3. Enter the following at the command line:
 - a. `php bin/magento setup:upgrade`
4. In the admin, go to Stores -> Configuration -> Advanced -> Advanced. The extension should be listed and enabled.

The screenshot shows the 'Advanced' configuration page in the Magento 2 admin. Three dropdown menus are visible, each set to 'Enable': 'Magento_Wishlist', 'Magento_WishlistSampleData', and 'Magnetic_Connector'. The 'Magnetic_Connector' dropdown is highlighted with a red rectangular box.

5. You can go back to System -> Cache Management and re-enable caching

Manual Installation

1. After downloading the extension from GitHub, upload the app directory into the root directory of your Magento installation.
2. Disable caching under System -> Cache Management in the Magento 2 admin
3. Edit app/etc/config.php file and add this line:
 - a. `'Magnetic_Connector' => 1,`
 - i. Make sure the commas are valid
4. In the admin, go to Stores -> Configuration -> Advanced -> Advanced. The extension should be listed and enabled.

The screenshot shows the 'Magnetic_Connector' setting in the Magento 2 Configuration page. The setting is set to 'Enable' and is highlighted with a red box. Above it, the 'Magento_Wishlist' and 'Magento_WishlistSampleData' settings are also shown, both set to 'Enable'.

5. You can go back to System -> Cache Management and re-enable caching

Configuration

Configuration of the Magnetic Extension allows for configuration website code updates. It is important to note that partial configurations can be made at the default configuration scope, which will be applied to all websites and individual configurations for each website. You must select the appropriate Website within "Configuration Scope" to ensure the configuration is applied to the intended website.

Website Code Configuration

Once the website code is enabled, the required JavaScript will be installed onto all webpages on the site.

1. In the admin, go to Stores -> Configuration -> Magnetic -> Website Code
2. Select appropriate "Store View" to install website code to.
3. Type in provided CLIENTIDENTIFIER in the "Identifier" field
4. Open the "Enable Website Code" drop down menu and select "Yes"

The screenshot shows the 'Website Code' configuration page in the Magento 2 admin. The 'Store View' dropdown is set to 'Default Config' (highlighted with a red box and labeled '2'). The 'Enable Website Code' dropdown is set to 'Yes' (highlighted with a red box and labeled '4'). The 'Identifier' field contains 'CLIENTIDENTIFIER' (highlighted with a red box and labeled '3'). A 'Save Config' button is visible in the top right corner.

Support

If you have any questions, concerns, or are in need of assistance with the Magnetic Extension, please email support@magnetic.com for assistance. Doing so will create a ticket in our support queue for prompt assistance. You may also call Magnetic support team at (800) 590-6320 Ext. 1.
